EDUCATION

Colegio de San Juan de Letran (2023-Present)

Bachelor of Science in Information Technology with a specialization in Systems Engineering

- **Academic Standing** : Dean's lister (2nd Year - Present) | GPA : 1.56
- **Relevant Coursework :** Information Assurance & Security, Cybersecurity, Network Administration, Networking, Data Structures & Algorithms, Information Management, Embedded Systems, Mobile Programming

CERTIFICATIONS

- Cisco Certified Support Technician (CCST) - Cybersecurity (May, 2026)
- Information Technology Specialist in Databases (Dec, 2025)
- Information Technology Specialist in Networking (May, 2025)

TECHNICAL SKILLS

- Networking and Security : Network Administration, Protocol Analysis, Cisco Packet Tracer, VirtualBox (Lab Environment), Access Control & Security Policies.
- Language & Databases : SQL (MySQL), Java, C++, JavaScript, PHP, HTML/CSS.
- Framework & Tools : Node.js, React Native, OpenCV, Tensorflow, Git/Github, Android Studio, Visual Studio, Google Colab.

PROJECTS

IoT Smart Occupancy Monitoring System

Core Contributor & Computer Vision Assistant | Python, Embedded systems, Edge AI

- Collaborated in a multi-member techincal team to develop a seat-occupancy detection system for institutional libraries
- Assisted in data annotation, model training validation, and edge sensor/camera configuration to automate capacity tracking.

Edge AI Sign Language Interpreter Mobile Application

Lead Developer & Machine Learning Engineer | React Native, Tensorflow / OpenCV, Android Studio

- Architected and deployed an on-device computer vision mobile application that translates hand gestures into text in real time.
- Collected, labeled, and trained custom vision models over a sprint of 3-weeks, optimizing model size and inference speed for edge devices without external API latency.
- Handled end-to-end development, including UI/UX design, camera feed integration, state management, and debugging.

Full-Stack E-Commerce Web Application

Sole Developer | PHP, Node.js, SQL, JavaScript, HTML/CSS

- Designed and deployed a fully functional full-stack web storefront with custom product cataloging and dynamic transaction handling
- Refactored data layer architecture and business logic into application-level state handling after identifying database environment limitations with automated SQL action hooks/triggers.

EXPERIENCE

Customer Support Representative (May 2025 - August 2025)

Telecommunications Company

- Handled Tier -1 network, broadband connectivity, and account troubleshooting for telecommunications subscribers under strict SLA metrics.
- Diagnosed connectivity, hardware provisioning, and basic line/routing issues while walking non-technical clients through systematic isolation steps.
- Maintained detailed documentation and escalated persistent infrastructure or network incidents to higher-tier engineering teams.

CHARACTER REFERENCE

- De LoS Santos, Cristina (Dean & Associate Professor) - cristina.delossantos@letran.edu.ph
- Carlos, Maria Luisa (Capstone Facilitator) - marialuisa.carlos@letran.edu.ph
- Mojica, Lord Roland (Professor) - lordroland.mojica@letran.edu.ph
